

SxA two-way systems are perfect for use as powered floor monitors.

The correct projection angle is already incorporated into the enclosure design of the SxA250. Simply turn the SxA250 on its side and operate the system in the same manner as described above. The F200 adapters are necessary to convert the SxA100+ into a monitor and are shipped with the speaker. To install the adapters, simply insert them into the speaker (See Figure 8 below). The F200 adapters can be easily removed by pulling in the opposite direction.

The F200 Monitor Foot kit contains two plastic feet.

The F200 is used with any 12-inch Sx or SxA speaker enclosures.

Insert the feet firmly into the holes in the rear cabinet (See Figure 8).

Remove the F200 monitor feet by pulling in the opposite direction.
